

SOIL 410 Soil Classification

This advanced soil science course led by Dr. Konstantin Dlusskiy focuses on:

- Common landforms and parent materials associated with soils in Prairies
- Soil drainage classes and soil moisture regimes
- Soils of the ten Soil Orders in the *Canadian System of Soil Classification*
- Classification of human-modified soils
- Classification of soils to the Subgroup level
- Relation of soil forming processes and factors of soil formation to the genesis of corresponding soils

Prior knowledge of soil science at the introductory level is strongly recommended.
